ADMIN RECORD

Gentlemen:

Our March 28, 1994, letter (94-DOE-02478) agreeing to the proposed method for data aggregation indicated that this letter would follow. The March 22, 1994 Environmental Protection Agency letter requested submittal of revised Operable Unit schedules (showing impacts from the work stoppage and the implementation of the data aggregation methodology), no later than three weeks from receipt of the letter (March 24, 1994).

Because of the magnitude of the time of the work stoppage, approximately seven and a half months, we are requesting additional time for resubmittal of the revised schedules. We must access (1) the day-for-day slip of the schedule directly associated with the work stoppage, as well as (2) additional time to perform the "additional work or modifications to work," as per Part 32 of the Interagency Agreement. There is also the possibility that milestone adjustments in support of accelerated approaches could make impact on selected operable units less than day-for-day slip.

We are requesting approval to submit our proposal for the revised schedules for the affected Operable Units by May 9, 1994, rather than April 14, 1994.

If you have any questions, please contact me at 966-4538.

Sincerely,

Jessie Roberson
Acting Assistant Manager for
Environmental Restoration
